

Installation Guide

Double Motor - TWINMAT III

Model: TW 42

Installation Steps

- Step 1 : Before installing, do check that the mains power cord is not plugged onto mains power supply.
- Step 2 : Put 2 pcs of 9 Volts back-up batteries into the batteries room : Open the cover, plug the connector onto the batteries in ways that the wires in the upper position, then close the cover.
- Step 3 : Wind up the mains power cord and the handset cable around the hooks (as described on the drawing) to avoid any damage during handlings.
- Step 4 : Plug the handset connector into the dedicated socket.
- Step 5 : Do match the graphic symbols on the motor with the axis of the bed frame :
 " Head-side " symbol must correspond to the axis linked to the back-rest mechanism,
 " Foot-side" symbol must correspond to the axis linked to the foot-rest mechanism.
- Step 6 : Before mounting the motor onto the bed frame, do check out that the bed frame is in horizontal position.
- Step 7 : Pull out the red cap and slide aside the cover enabling the holding of the bed frame axis.
- Step 8 : Make sure the piston inside is in the reset position, then mount the motor onto the axis of the bed frame. Make sure they are engaged properly.
- Step 9 : Close the cover and push back the red caps. Repeat from Step 5 for installing the other side.

! CAUTION

- This motor is for using in slat bed frames only.
- The distance between these axes of the bed frame must be 581 millimeters.
- The duty cycle for each motor is 10%, namely a continuous operating period of maximum 2 minutes, and followed by a rest period of minimum 18 minutes.
- The installation task must be carried out by qualified technician.
- Any damage caused by mounting / dis-mounting action made by end-user shall induce a refusal of the guarantee and shall not impute to any responsibility of the manufacturer.
